EDUCATION

Software engineering Virtual University

03/2018 - 06/2022

Pakistan(Lahore)

Education

- Gained a deep understanding of software design principles, programming languages, algorithms, database management, software testing, and project management.

WORK EXPERIENCE

Front-end developer Oware

01/2021 - Present

Pakistan(Lahore)

Oware is a Cloud Supply Chain startup

Achievements/Tasks

- Playing the role of front-end team lead for the past 2 years and tracking the progress of various projects, ensuring timely delivery and efficient resource allocation.
- Implemented the high-level Framework and integrated new components that improved performance by 200%.
- Proposed a solution to generate unique pallet IDs by combining the current date and a unique number. This approach enables easy tracking and categorization of pallets based on creation dates.
- Trained and mentored 4 juniors in the team, diligently reviewed their code, and provide constructive feedback and suggestions for improvement.

Front-end developer Hello World

02/2020 - 01/2021

Pakistan(Lahore)

An IT company with a Difference! Building the Future by Serving technology better

Achievements/Tasks

- Designed and developed a lottery app featuring an attractive interface and dynamic slide-based display of real-time data scraped from the main lottery site.
- Managed source code and project assets, tracked changes, and facilitate code reviews utilizing version control software improving the organization by 30%.
- Utilized Confluence to implement new feature documentation and Jira for efficient ticket management and tracking.

PERSONAL PROJECTS

Customer portal (01/2021 - Present)

- Collaborated closely with stakeholders to spearhead a comprehensive revamp initiative of the customer portal, resulting in a significant increase in customer acquisition and retention.
- Try to define code architecture decisions to support a high-performance and scalable product with a minimal footprint.
- Provide constructive code reviews prior to a production change for the application development change.

Sharebear (06/2022 - 01/2023)

- Developed a scalable application that successfully onboarded over 2000 customers to the application. Utilized industry best practices, and employed cutting-edge technology to drive customer engagement.
- Ensured that the components were optimized for performance and adhered to best coding practices, including clean code.

Buymetro (04/2023 - 06/2023)

- Develop a BuyMetro application in Next.js with dynamic routing and using server-side rendering (SSR).

Dinehome (02/2020 - 10/2020)

- Dedicated significant effort towards implementing front-end design to create an interactive and visually appealing user interface.
- Through the development of a cutting-edge multi-restaurant system, the application empowers users to effortlessly explore and order from a diverse number of restaurants, leading to a remarkable 50% surge in customer satisfaction and loyalty.
